Hi Jason and Rebecca,

Sediments from the mines in Silverton have passed TCLP tests so people should be able to just take the sediment to the county/city landfill. That would be my recommendation but it would also be up to the city/county to determine.

Hi Jason,

Once we get a phone line, they can come to me. For now, please just keep track of them and we will get back to them.

Thanks,

Rebecca

Hi Rebecca,

We have received multiple calls today from people who've had the orange water contaminate their soil. One guys said that he's scooped it all up into black trash bags and wants to know what to do with it.

Can you please advise me on how and where to route these types of calls?

Thanks, Jason

Hi Jason,

This is an email so that you have my email. I have inquiries out on your two questions. My cell is 240-381-7765.

Best,

Rebecca Broussard
